## Allergy Antigen Preparation

During recent audits, Medicaid Program Integrity Unit identified instances where providers were incorrectly billing Current Procedural Terminology (CPT) code 95165 (professional services for the provision of antigens for allergen immunotherapy; single or multiple antigens, per dose). Examples include overbilling the number of units prepared and/or billing over multiple days to bypass medically unlikely edits (MUEs).

Claims billed to Medicaid must follow the American Medical Association's guidelines, as well as the National Correct Coding Initiative (NCCI) for Medicaid services. NCCI is a compilation of coding policies established by the Centers for Medicare and Medicaid Services and includes two types of edits: NCCI Procedure-to-Procedure (PTP) edits and Medically Unlikely Edits (MUEs). An MUE is the maximum units of service reported for a HCPCS/CPT code on the vast majority of appropriately reported claims by the same provider/supplier for the same beneficiary on the same date of service.

Providers were notified of Medicaid's implementation of these required edits in the April 4, 2011, Medicaid Information Release MA11-05. It states, in pertinent part:

Section 6507 of The Affordable Care Act requires state Medicaid programs to implement National Correct Coding Initiative (MCDNCCI) methodologies in their claims processing systems to prevent improper payments if incorrect procedure code combinations and medically unlikely units of service are reported on Medicaid claims. Idaho Medicaid began to apply MCDNCCI edits to claims processing for dates of service on or after April 1, 2011.

Federal law mandates that the NCCI and MUE edits must be implemented. The MCDNCCI edits supersede the Medicaid State Plan, all Idaho Medicaid policies, Medicaid articles, and other previous guidance provided on procedure-to-procedure and units-of-service edits.

Providers are required to follow NCCI guidelines for services billed to Idaho Medicaid. Per these guidelines, one unit of CPT code 95165 is defined as one milliliter of antigen prepared. Providers may report a maximum of 30 units of service per NCCI's MUEs. Providers are not allowed to bill CPT codes over multiple days and/or multiple lines in order to bypass MUEs and are required to only bill for dates services were actually rendered.

Section V of Chapter XI, Medicine Evaluation and Management Service CPT Codes 90000-99999, of the January 2023 Medicaid National Correct Coding Initiative Policy Manual for Medicaid Services, as well as previous versions, addresses MUEs. It states, in pertinent part:

2. Providers should be cautious about reporting services on multiple lines of a claim utilizing modifiers to bypass MUEs. The MUEs were set so that such occurrences should be uncommon. If a provider does this frequently for any HCPCS/CPT code, the provider may be coding UOS incorrectly. The provider may consider contacting their national health care organization or the national medical/surgical society whose members commonly perform the procedure to clarify the correct reporting of UOS.

3. For purposes of reporting UOS for antigen preparation (i.e., CPT codes 95145-95170), the physician reports "number of doses". The NCCI program defines a dose for reporting purposes as 1 milliliter (ml). Thus, if a physician prepares a 10 ml vial of antigen, the physician may only report a maximum of 10 UOS for that vial even if the number of actual administered doses is greater than 10.

Additional information regarding NCCI edits can be found in the [Medicaid NCCI Policy Manual; Section 3.5 of Idaho Medicaid Provider Handbook, General Billing Instructions](#); and the [January 2018, March 2018, December 2022, and February 2023 MedicAide Newsletters](#). Services not billed in accordance with Idaho Medicaid rules are subject to recoupment and civil monetary penalties.

## Medicaid Protection

Medicaid Protection was put in place at the beginning of the COVID-19 pandemic and provided continued Medicaid coverage for individuals who may have otherwise been ineligible. Congress has recently passed a bill that ends this continued coverage requirement on April 1, 2023.

This does not mean your customers' Medicaid coverage will automatically end on April 1, 2023 even if you are receiving Medicaid as a result of this special protection.

DHW will send notices to customers telling them about any coming changes in their eligibility or benefits, and if they need to complete a re-evaluation.

To ensure you receive notices regarding your benefits and re-evaluations, please report any changes in your contact information, including phone number and mailing address. If your contact information has changed, or you want to confirm your current information, contact DHW using the information below. You can also report changes by visiting [www.idalink.idaho.gov](http://www.idalink.idaho.gov).

Phone 1(877) 456-1233

Email [MyBenefits@dhw.idaho.gov](mailto:MyBenefits@dhw.idaho.gov)

For more information, visit the [Medicaid Protection FAQ page](#).

## Attention: All Hospital and Long Term Care Facility Provider Types! Additional Terms Documentation

An enhancement to the Provider Enrollment Application and the current process in collecting Additional Terms documentation for Hospitals reimbursed using 3M™ All Patient Refined DRG (APR DRG) Software and Long-Term Care Facility provider types is moving through our implementation process, and we anticipate this change to have provider impact by May 1, 2023. Many providers have already completed the Additional Terms documentation; however, we must require Hospital and Long-Term Care Facilities to repeat their acknowledgement and electronically sign the terms that are presented on the Documents tab in the application during their next maintenance. If a change in ownership is reported the Additional Terms will require re-acknowledgement. Thank you for your cooperation in this matter.

## Attention: Hospice Program Audit and Claims Reprocessing

The Department completed an analysis of paid claims between 2/1/2022 to 2/1/2023 that may have paid incorrectly. Claims were paid when participants were receiving hospice care, but the Department had not been notified. Claim reprocessing will begin on 3/3/2023.

Hospice agencies are required to communicate and coordinate all services included in the patient's plan of care. This includes working with ancillary service providers so claims are billed

correctly. If ancillary service providers have questions about a claim reversal, they may contact their [Gainwell Provider Relations Consultant](#) or the Medical Care Unit and request the hospice agency name for the participant. It is the responsibility of the hospice provider to work with the ancillary service provider on the claim(s) in question.

The [Hospice Services, Idaho Medicaid Provider Handbook](#) requires the hospice provider to notify the Medical Care Unit (MCU) of all hospice elections or recertification for Medicaid participants, regardless of other insurance coverage. The provider is required to notify the MCU of the election or recertification within 15 working days. Election requests received after the first 15 days will be evaluated on a case-by-case basis; or election start date will begin the date of the faxed hospice election documentation is received.

Thank you for the continued service you provide to Idaho Medicaid participants; we look forward to correcting these impacted claims and appreciate your patience.

## **Policy Update: Ordering, Referring, and Prescribing (ORP) Providers**

The ORP policy is being updated to include physician residents. Providers are encouraged to review the section on Ordering, Referring and Prescribing and Providers within the [General Information and Requirements for Providers](#) handbook to ensure their business practices are in compliance.

Questions and comments about this article may be submitted to the Medical Care Policy Team at [MCPT@dhw.idaho.gov](mailto:MCPT@dhw.idaho.gov).

## **Idaho Health Care Conference 2023 – Save the Date!**

Gainwell Technologies is eager to invite providers and their staff personnel to the 30th annual statewide Idaho Health Care Conference (IHCC) in May. This year's conference will be held in-person only at the locations noted below. We will be presenting a comprehensive overview of how and when to submit Provider Maintenance to reflect changes to an existing Provider record using the Gainwell Provider Enrollment Application system. The Idaho Medicaid Provider Enrollment Application system helps simplify processes for maintenance requests, features dynamic screens, electronic signature options, and less paper transactions. We will share tips on navigating the maintenance process. Join us to learn more!

**Join us at the 2023 Idaho Health Care Conference** from 8:00 AM to 4:00 PM on the following dates:

- May 11, 2023: North Idaho—Red Lion Templin's Hotel on the River, Post Falls
- May 16, 2023: Eastern Idaho—Shoshone Bannock Casino Hotel, Fort Hall
- May 18, 2023: Treasure Valley—Nampa Civic Center, Nampa

We hope you'll attend the conference at a location near you!

## **Idaho Medicaid will Remove the MUE Columns from Fee Schedule**

Medically Unlikely Edits (MUEs) defines the maximum Units of Service (UOS) that a provider would report for each HCPCS/CPT code, under most circumstances for a single participant on a

single date of service. The purpose of the MUE is to detect and deny unlikely claims on a pre-payment basis to stop inappropriate payments. MUEs are coding edits, not medical necessity edits and they do not exist for all HCPCS/CPT codes. Medicaid MUEs are applied separately to each line of a claim. The values are updated by CMS quarterly. For more information please see [NCCI for Medicaid | CMS](#).

Although CMS publishes most Medicaid MUE values on its website, other MUE values are confidential. The State is required to use confidential MUE files to process claims and is not able to release any information from those files.

Effective 04/01/2023, Idaho Medicaid will remove the MUE columns from fee schedule because we can only publish the same values that are made publicly available by CMS. The State is restricted from publishing the MUE values it is required to use. Providers are encouraged to check publicly available MUE values on the following site [Filtered NCCI Medically Unlikely Edits \(MUEs\) \(medicaid.gov\)](#).

## Non-Covered Services

As a reminder to all providers, any codes not appearing on the Idaho Medicaid Fee Schedule are considered non-covered. Informational only codes are not considered covered codes and are not eligible for reimbursement. Providers billing on a UB-04 claim form should be especially careful in their billing practices. While not all revenue codes require a HCPCS, providers should not be billing for services that are considered non-covered or informational under these revenue codes to receive reimbursement. This may constitute fraud and lead to referrals to the Medicaid Program Integrity Unit. Any reimbursement received for non-covered or informational only services may be subject to recoupment and penalties. See Non-Covered and Excluded Services in the [General Information and Requirements for Providers](#) for more information.

Questions and comments about this article may be submitted to the Medical Care Policy Team at [MCPT@dhw.idaho.gov](mailto:MCPT@dhw.idaho.gov).

## C-Code Coverage

C-Codes are temporary codes for the hospital outpatient prospective payment system (OPPS) used by Medicare. The OPPS payment method is not utilized by Idaho Medicaid. However, in March of 2018 Idaho Medicaid began covering a limited number of C-Codes for coverage to support hospitals required to use OPPS methodology and decrease incidents of split billing. Those codes that were determined not to be covered by Idaho Medicaid for reimbursement were made informational only to assist in claims processing.

Per provider requests made through the Idaho Hospital Association, Idaho Medicaid has reviewed C-Codes previously listed as informational only and made a coverage determination. The following C-codes are being added for coverage. All other C-Codes that were informational only not appearing below are non-covered effective May 1, 2023. As a reminder, any codes not appearing on the Idaho Medicaid Fee Schedule are considered non-covered. New codes for drugs with an FDA indication and which are eligible for a manufacturer's rebate will be covered and placed on the Idaho Medicaid Fee Schedule in compliance with the Social Security Act 1927, "Payment for Covered Outpatient Drugs".

Please, allow additional time for the system to be updated. Claims will be reprocessed once complete. All statute, rule and provider handbook requirements apply.

<b>Covered Codes</b>			
<b>Codes</b>	<b>Description</b>	<b>Effective Date</b>	<b>Prior Authorization</b>
<b>C1721</b>	Cardioverter-defibrillator, dual chamber (implantable)	7/1/2022	No
<b>C1722</b>	Cardioverter-defibrillator, single chamber (implantable)	7/1/2022	No
<b>C1750</b>	Catheter, hemodialysis/peritoneal, long-term	7/1/2022	No
<b>C1752</b>	Catheter, hemodialysis/peritoneal, short-term	7/1/2022	No
<b>C1754</b>	Catheter, intradiscal	7/1/2022	No
<b>C1767</b>	Generator, neurostimulator (implantable), non-rechargeable	7/1/2022	No
<b>C1777</b>	Lead, cardioverter-defibrillator, endocardial single coil (implantable)	7/1/2022	No

RE: Mandatory Checking of the Prescription Drug Monitoring Program (PDMP)

Dear Controlled Substance Registrant,

Idaho Code [37-2722](#) went into effect on October 1, 2020, mandating that prescribers check the Prescription Drug Monitoring Program (PDMP) database. When this law was passed, enforcement was to be educational initially. Beyond a suitable period, enforcement could then be a collaborative effort by the Board of Pharmacy and the respective licensing boards.

We want to thank those prescribers who abide by the law and check the PDMP prior to prescribing. **The period for enforcement discretion ends March 31, 2023. Those prescribers not checking the PDMP prior to prescribing an opioid analgesic or benzodiazepine in accordance with Idaho Code [37-2722](#) are in violation of the law and subject to disciplinary action.** The PDMP records each inquiry it receives (whether by the provider or their delegate).

Idaho has instituted Statewide Gateway integration to make PDMPs more convenient to use and access. Integrations into electronic health record (EHR) systems helps streamline the process. The integration eliminates the need for providers to log in separately to the PDMP. Though integration is not mandatory, it is highly encouraged, and funds are available for providers or facilities. For additional information visit: [PDMP Gateway-Welcome Kit](#).

Please be sure your user profile is accurate and up to date. For additional information a FAQ is posted at [www.BOP.idaho.gov](http://www.BOP.idaho.gov). Questions can be sent to [pdmp@dopl.idaho.gov](mailto:pdmp@dopl.idaho.gov). Thank you for your efforts to comply with the Idaho Uniform Controlled Substance Act.

Sincerely,

Nicki Chopski, PharmD  
Health Professions Bureau Chief

## PDMP Mandatory Checking Frequently Asked Questions

### Idaho Code

**Q. Is there an Idaho law regarding mandatory checking a patient prescription history in the Idaho PDMP?**

A. Yes. Idaho Code 37-2722(f) effective October 1, 2020.

<https://legislature.idaho.gov/statutesrules/idstat/Title37/T37CH27/SECT37-2722/>

**Q. What is the specific compliance expectation for prescribers?**

A. Idaho Code 37-2722(f) states in pertinent part:

“Prior to issuing a patient a prescription for outpatient use for an opioid analgesic or benzodiazepine listed in schedule II, III, or IV, the prescriber or the prescriber’s delegate shall review the patient’s prescription drug history from the preceding twelve (12) months from the prescription drug monitoring program and evaluate the data for indicators of prescription drug diversion or misuse.”

**Q. Are there any exceptions for PDMP mandatory checking?**

A. Yes, 37-2722 (f)(1)(2) states in pertinent part:

“The review is not required:

(1) For patients:

- (i) Receiving treatment in an inpatient setting;
- (ii) At the scene of an emergency or in an ambulance;
- (iii) In hospice care; or
- (iv) In a skilled nursing home care facility; or

(2) For a prescription in a quantity intended to last no more than three (3) days.”

**Q. Who is considered a registered Idaho prescriber?**

A. A professionally licensed Idaho prescriber that has an active Idaho Practitioner Controlled Substance Registration an associated Federal DEA Controlled Substance Registration, and prescribes to human patients.

**Q. Who is considered a registered prescriber delegate?**

A. Nurse, medical or office assistant, current student of a health profession if a licensed practitioner or registered graduate of such profession who may access the database, or a registered pharmacy technician who is designated by a supervising practitioner or pharmacist.

**Q. How does a person become a registered delegate?**

A. The person must create a PDMP delegate user account and select a supervisor (prescriber). The prescriber will receive the request via their PDMP account for approval.

**Valid Search**

**Q. Does reviewing a patient history once validate all controlled substance prescriptions for that encounter?**

A. Yes. A prescriber or prescriber's delegate needs only view PDMP once per patient encounter no matter if two or more prescriptions are prescribed.

**Q. Is there is a way for a prescriber to view past searches?**

A. Yes, in the user account under RX Searches there is a Prescriber Report option. This will provide a snapshot of prescribing history for covered substances for the most recent report as well as available historical reports.

**Compliance**

**Q. How does the division know that a prescriber or prescriber's delegate has checked the Idaho PDMP and are there any requirements for documenting when checked?**

A. The PDMP system tracks compliance for each inquiry. While there is no requirement by law for the prescriber or prescriber's delegate to document PDMP checks, it may be best practice to do so.

**Q. How is PDMP mandatory checking going to be enforced?**

A. There was a subcommittee that was clear that enforcement was to be educational initially. Beyond a suitable period, enforcement could be a collaborative effort by the division and the respective licensing boards.

With more than two (2) years having passed since the implementation of mandatory checking, enforcement discretion ends 03/31/2023.

**PDMP Statewide Integration**

**Q. Signing in and out of the PDMP system takes too much time. How can I quickly obtain the necessary patient data and still meet the mandatory requirements?**

A. PDMP data can be integrated into an electronic health record (EHR) through our PDMP integration platform.

**Q. How does integrating with the PDMP platform help me get data faster?**

A. The PDMP data is integrated into the EHR or pharmacy management system. This integration empowers clinicians to access patient data at the point of care.

**Q. Does checking via the PDMP integration platform count towards the mandatory checking?**

A. Yes, the PDMP integration does track compliance for each inquiry search.

**Q. Is PDMP integration mandatory?**

A. No, PDMP integration is not necessary and if chosen PDMP data will still be accessible through the Idaho PDMP web portal.

**Q. Is there a cost for the PDMP Integration?**

A. Yes, there is a fee. However, the Idaho Board of Pharmacy will provide for the initial user license fee expenses to set up the integration.

**How long does it take for integration to be completed?**

A. The process and timeline for integration is dependent upon your EHR or pharmacy management system vendor.

**How do I register for the integration?**

A. To register for PDMP Integration into your EHR or Pharmacy Management System review the following [Gateway Integration Welcome Packet](#).

Then go to <https://connect.bamboohealth.com/> and click Create An Account to begin.

## What's ECHOing at ECHO Idaho?

ECHO Idaho is a virtual platform that gives voice to knowledge. Our CE-eligible series combine interactive learning and case-based discussions that offer every health professional the opportunity to participate in a community where experts and peers share knowledge, experience and expertise using technology to connect.

### April 2023

#### Free, Virtual, 1-hour Continuing Education Sessions in April

**\*\*Registering with Project ECHO will provide you with regular email updates on all upcoming ECHO trainings. Still not registered? Register [here](#).**

#### **Adolescent Substance Use Disorder**

**Date:** Wednesday, April 12, 2023

**Time:** Noon - 1 p.m. Mountain time

**Topic:** Trauma and Addiction

**Featuring:** Ryan Billington, MD, Psychiatrist at St. Luke's

Add this session to your calendar, [here](#).

**Date:** Wednesday, April 26, 2023

**Time:** Noon - 1 p.m. Mountain time

**Topic:** Mental Illness and Addiction

**Featuring:** Cate Heil, MD, Addiction Medicine Fellow, Full Circle Health

March 17, 2023

**MEDICAID INFORMATION RELEASE MA23-06**

To: Personal Assistance Agencies

From: Juliet Charron, Administrator 

Subject: Personal Care Services (PCS) by Spouses or Parents

Certain flexibilities in federal rules have been granted to state Medicaid Agencies for the duration of the Public Health Emergency (PHE), effectively declared by the Secretary of Health and Human Services in January of 2020. These flexibilities were intended to support access to services that may have otherwise become unavailable.

One of those flexibilities has been the temporary waiving of a federal regulation ([42 C.F.R. §440.167 Personal Care Services](#)), which prohibits certain individuals from being compensated by a state Medicaid Agency for providing personal care services (PCS) to a Medicaid participant, primarily certain family members. In Idaho, this is specific to spouses of participants and parents of minor children who are participants.

The federal emergency declaration ends May 11, 2023, which directly affects this flexibility for the Idaho Medicaid State Plan PCS benefit. Idaho Medicaid applied for a temporary 1115 authority to allow that State Plan benefit flexibility to continue an additional sixty (60) days through July 11, 2023. This applies to parents as caregivers and some spouses as caregivers for individuals receiving PCS through the state plan if not on the Aged and Disabled waiver.

For spouses providing care under the Aged and Disabled waiver, the state has authority under its Appendix K application to continue the flexibility for attendant care services only (not state plan PCS) through November 11, 2023.

Idaho Medicaid is investigating a number of federal policy options to allow parents and spouses to act as paid caregivers permanently. The Medicaid program will have to ensure that whatever option is used to make this flexibility permanent is compliant with state and federal laws. This may mean some changes to the flexibility as they are different from those during the public health emergency. Idaho Medicaid is looking at all options with their federal partners to find the one best suited for our families.

Thank you for participating in the Idaho Medicaid Program.

## MEDICAID INFORMATION RELEASE MA23-07

TO: Skilled Nursing Facility Providers

FROM: Juliet Charron, Administrator 

SUBJECT: Changes to Idaho Medicaid Nursing Facility Assessment Schedules

Beginning October 1, 2023, the Optional State Assessment (OSA) will be the only assessment type that will include all Minimum Data Set (MDS) data elements required for Resource Utilization Group (RUG) classification. States wishing to maintain a RUGs-based case mix reimbursement system must require Medicaid-certified nursing facilities to complete the OSA with each federally required MDS assessment. As of October 1, 2023, the Department is requiring that a concurrent OSA be completed, with the same Assessment Reference Date (ARD), as each federally required assessment submitted. This will allow for a RUGs-based case mix score to be calculated and the current RUG-based reimbursement methodology to continue beyond October 1, 2023.

If a concurrent OSA (with a matching ARD) is not submitted with a federally required MDS assessment, then a RUG-based case mix score cannot be calculated and as a result the assessment will be excluded from the facility-wide and Medicaid case mix index calculations and associated MDS record processing procedures. This may ultimately result in the resident record being assigned to the delinquent BC1 category as no RUG classification information would be available.

The Department recommends that nursing facilities start reviewing their internal software systems for OSA compatibility prior to October 1, 2023 in preparation for the implementation of the OSA requirement. As a reminder, the purpose of the OSA is to capture RUG-III information to continue reimbursement under a RUG-based resident classification system until the Department has sufficient data and time to model rates using the Patient-Driven Payment Model (PDPM) resident classification system. The modeling will continue through state fiscal year 2023.

The Department is sympathetic to nursing facility concerns regarding the duplication of information in the OSA which may increase the administrative burden of completing this MDS assessment. We encourage providers to work with the IHCA and their MDS software vendors to streamline data input for fields that are duplicated on the federally required assessment and the OSA, in the hopes of reducing the administrative burden for all nursing facility providers.

## Provider Training Opportunities

You are invited to attend the following webinars offered by Gainwell Technologies Regional Provider Relations Consultants.

### April: PEA Enrollment

A comprehensive overview of how and when to submit Provider Maintenance to reflect changes to an existing Provider record using the upgraded Provider Enrollment Application system. The upgraded Idaho Medicaid Provider Enrollment Application features a new look and feel, simplified processes for maintenance requests and features dynamic screens and electronic signature options, which will result in quicker processing times and less paper transactions. Join us to learn more!

Training is delivered at the times shown in the table below. Each session is open to any region, but space is limited to 25 participants per session, so please choose the session that works best with your schedule. To register for training, or to learn how to register, visit [www.idmedicaid.com](http://www.idmedicaid.com).

	April	May	June
	PEA New Enrollment	PEA Maintenance	Eligibility
